## FOM II Enclosure & Chassis

### Product Features

- Single-Card enclosure style
- Two rack-mountable chassis styles
- Single-slot and double-slot blank panels
- For use with any FOM II series modem
- Lightweight
- Durable

**HF-20A 20-Slot Chassis**

### Product Description

VERSITRON HF Series FOM II Enclosures and Chassis are designed for installations using any VERSITRON FOM II Series Fiber Optic Modem, Isolator or Interface Extender. Available are the HF-1 single-card enclosure for standalone applications, and a choice of 2 chassis for rack-mount installations, the HF-2SS 2-Slot and the HF-20A 20-Slot.

The HF-1 enclosures provide one FOM II modem slot for standalone installations. These enclosures are lightweight with rubber feet and may be installed in a variety of locations. For rack mount installations, the HF-2SS chassis provides one or two FOM II modem slots. This 1U high space-saving chassis fits into standard 19-inch racks.

Each modem installed in the HF-1 or HF-2SS requires a power adapter for converting VAC to VDC. Model PSAC08 converts 110VAC to 12VDC with the USA style plug. Model PSAC09 converts 220VAC to 12VDC with the European style plug. Model PSAC10 is a regulated power adapter used only with F230x Series modems for converting 110VAC to 12VDC. Model PSAC15 is also a regulated power supply but is only used with the F22xx Series modems for converting 110VAC to 12VDC.

The HF-20A chassis is able to house up to 20 VERSITRON FOM II circuit cards. The chassis is powered by either the AC300W regulated power supply or the AC300WR redundant power supply.

### Product Models

Model	Description	Style	Slots	Dimensions	Weight
HF-1	Single-Card Enclosure	Stand-Alone	1	7.1 x 1.3 x 11.6 Inches	18 ounces
HF-2SS	2-Slot Chassis	Rack-Mount	2	19 x 1.7 x 13.8 Inches	40 ounces
HF-20A	20-Slot Chassis	Rack-Mount	20	19 x 7.0 x 11.4 inches	73 ounces
